That's great news. I can also confirm the FR module submission went through on our end. With this, the San Joaquin Renewables project has submitted to EPA six GSDT modules (all five modules with information required for permit application plus the Alternative PISC Timeframe module). I'll defer to Region 9 for additional information related to the application evaluation.

Thank you again for your patience and assistance with fixing the issue.

Best,
Molly

Yes, it appears to have worked this time and I did get a confirmation email back of the submittal. I believe with that we have submitted all materials for the completeness evaluation to begin? Thank you! Greg

Hi Greg,

Our developer at PNNL believes the issue has been resolved. Would you mind trying to resubmit once more? Thank you for your patience as we work to fix this issue.

Best,
Molly

Hi Greg,

I hate to sound like a broken record, but our developer has taken your feedback and is requesting you try the submission again.

If this still doesn't work, the region will be sending you a request to submit the FR materials through the Information Request Module as a workaround.

Thanks,
Dan

Subject: RE: GS Electronic Signature and Use Agreement for San Joaquin Renewables LLC

We've tried again and the problems are still the same with the Financial Responsibility module. If this is any help, below is the steps we took:

- After pushing 'submit information' on the 'Complete Submission' tab, we get the pop-up window saying that validation has succeeded, push 'Yes' to submit. Push 'Yes'.
- Wait 5+ minutes (we waited 30 minutes earlier today)
- No confirmation is sent. Retrying the steps above gets the 'Missing Files on Server' error.
- Trying to Exit out of the module doesn't work by pushing 'Exit' or the 'Close' button. Need to use the Windows Task Manager to close Java Web Launcher in order to get the window to close.

Again, we didn't have any of these issues with the other modules. Thank you again for the troubleshooting. Greg

Hi Greg,

We'd like to you attempt to submit in the GSDT again. You don't need to reupload, just submit what is already there. Our developer made some changes behind the scenes and believes he has found the solution.

Thanks,
Dan

When we try the FR again it's back to the same error below. Other modules have special characters in uploads, etc., so I don't think that is the issue. The Financial Responsibility module just doesn't seem to be working for some reason. Given that GSDT is not working, If there's another way we can submit the FR pieces to finalize the submission, please let us know. We would like to complete the application submission as soon as possible as this permit is a critical path item for our project construction. Thank you again for your assistance on this. Greg

Submission Failed: 3 attached files cannot be found on the server.
The names of the missing files are:

SJR_FR_cost_estimates_073021.xlsx
Additional_Information.txt
NewEnergyRisk.pdf

You will need to upload the files again from your local computer before a submission can be made. Step through the tabs and look for red highlighted fields. Note that the missing files may be hidden in a tab not currently shown. Clear the file field for a missing file by hitting the "X" button and then re-attach the original file by hitting the paperclip button. Note that if multiple files are attached for a missing file field, all of them must be re-attached.

Contact your permitting authority for guidance if you no longer have the original files that are missing.

Dan, unfortunately we are still having the same error on the Financial Responsibility module. The validation says everything is fine, but then it will not let us complete the submission. I replaced the .xlsx file with one that only has underscores (in my Windows browser), but see that the file name on the 'pnnl.gov' server still has dashes even when I do that, and it does not resolve the issue.

These three files are small, and the 'txt' file is just a placeholder stating that that field it's not relevant because EPA has primacy and therefore there is no 'primacy state'. Can I email them to you so we can finalize the submission?

We also have not tried to the final Project Information Tracking submission because it asks for confirmation that the financial responsibility module has been submitted, but if you think we should submit that please let us know. Thank you again, Greg

You can proceed with attempting the submission. The system admin did detect that a special character may be present in the .xlsx file you uploaded, but suggested going ahead anyway as everything else looks fine. If you're still encountering an issue, it might be that file. In that event, we suggest renaming the file with no dashes or other characters except underscores.

Thanks,
Dan

Subject: RE: GS Electronic Signature and Use Agreement for San Joaquin Renewables LLC

Hi Greg,

Please see this message from our developer:

OK, I've deleted all 6 files from the R09-CA-0006 home area. First thing they'll need to do is to use the "X" to remove each of these files from what is shown in the reporting tool. These files are actually already gone from the server, but the reporting tool needs to be made consistent (the code will attempt to remove the file from the server, but if it can't find it to remove it as in this case, it simply clears the field value). After they've done that (and all the file fields are empty), then they need to get the agreed to file names without spaces or any other special characters by renaming the files locally, I assume on a Windows host. I'd like for them to remove the single dash from that one "SJR_FR..." file as well just so we are dealing with the simplest situation possible to get them to where they can make a successful submission. So I would like to see the following as the file names:

1. Additional_Information.txt
2. New_Energy_Risk_LOI_to_US_EPA_for_SJR.pdf
3. SJR_FR_cost_estimates_073021.xlsx

My recommendation is that they attach and save with these file names (which does the upload) and then quit the reporting tool. Then let us know and I will check to make sure it all looks right to me—what files are on the server and

that the state XML file is consistent. Then, I will let you know it looks good so they can proceed to make the submission. This extra step may turn out to be overkill, but if there are any issues when they make the submission, we'd have to go back and do it anyway.

Importance: High

Hi Greg,

I'm having an ongoing discussion with our technical team. They are proposing deleting the files from that module and then having you try to reupload. Please let me know when you receive this message and confirm that you are logged out as we don't want to mess with the system while you are working in the module. Once done, we'll have you try the upload again. Please make sure that none of your filenames contain the special characters: ~!@#%&=<>^\$?*+()|{}[]

Thanks,
Dan

Subject: RE: GS Electronic Signature and Use Agreement for San Joaquin Renewables LLC

Thank you very much, that seems to have resolved the issue and now we see the information when Dr. Paskach logs in. We have successfully submitted with most of the modules.

However, we are now having an error with the Class VI Financial Responsibility Demonstration module. Even though 'Validate Required Fields' indicates everything is OK, when we go to submit we get the following error. When we try to reupload the same 3 documents we get the same error again. Thank you for your assistance. Greg

Submission Failed: 3 attached files cannot be found on the server.
The names of the missing files are:

SJR_FR-cost-estimates_073021.xlsx
Additional-Information.txt
New-Energy-Risk-LOI-to-US-EPA-for-SJR.pdf

You will need to upload the files again from your local computer before a submission can be made. Step through the tabs and look for red highlighted fields. Note that the missing files may be hidden in a tab not currently shown. Clear the file field for a missing file by hitting the "X" button and then re-attach the original file by hitting the paperclip button. Hello all. When we log in to the GSDT with Dr. Paskach's credentials unfortunately none of the information/files that have been added with my credentials are showing up. We see that the Project ID is the same regardless of who logs in. Is there some action we should be taking to have the information show up when Dr. Paskach logs in to authorize the submission? Thank you, Greg
